

Worming 2015
Please choose either
option 1 or 2

Option 1

Targeted worming
Please contact the practice
for an individual plan to suit
your horse/ponies needs.

Option2

Jan – Equest
Apr – Equimax
Jun – Equest
Oct - Equimax

****Remember - All new horses coming to your yard should be given a single dose of Equest Pramox. This will treat all round and tapeworms (including any encysted larvae) and should be done regardless of previous worming history****
